LAUNDRY & DRY CLEANING TERMS & CONDITIONS

The following may be apparent after cleaning / dry cleaning Curtains, Bed Covers, Duvets, Inner Duvets, Seat/Cushion Covers, Blinds & general upholstery.

- Shrinkage- Many fabrics are not totally pre-shrunk at the time of purchase 2-4% shrinkage can be expected on such fabrics. This shrinkage is beyond our own control.
- Yellow Stains –Fabrics tend to gradually turn yellowish with age due to the combined effects of heat, light, moisture, smoke fumes or other atmospheric soils. The exposed folds of curtains collect a greater amount of these elements causing yellow steaks to form, the dry cleaning function cannot remove these streaks.
- Light Damage –Direct & Indirect light weakens and discolours most fabrics and backing material, after exposure the fabric or coating can deteriorate to such an extent that it can damage or tear in normal laundry or dry cleaning
- Watermarks –Areas that get wet can show up as rings after dry cleaning, these may be difficult or impossible to remove.
- Stiffened Fabrics –Coatings on the fabrics or its linings are sometimes used to impart insulating qualities, some of these contain vinyl materials that are not totally resistant to dry cleaning. Loss of plasticizer from the vinyl can produce a very stiff and blistered fabric, unfortunately this is the responsibility of the manufacture and beyond our control.
- Colour Failure –Many fabrics are coloured by being surface printed rather than dyed, some of these surface colours are not colourfast to dry cleaning or laundry. Colours may fade, bleed/run and this is beyond our control.

Whilst we take every precaution possible, we are not held responsible for any of any of the above.

I ----- (Customer) take full responsibility for the cleaning.
